Education

B.F.A Computer Animation
and Game Design
A.A.S. Visual Arts

- 10 years experience in web development
- 8 years experience in fast paced, project heavy, creative ideation environments
- Strong knowledge of front end web development languages with in-depth understanding of image manipulation, video editing and layout applications

Experience

- VSA Partners (Senior Developer) OCT 2014 - Present
Hired from Contractor to Senior Developer. Specializing in Wordpress API, front end development. Maintain client relationships by delivering on or before deadlines and offering solutions for complex and/or spontaneous issues. Maintain client trust by training, offering and building new tools that improve websites. Working on various NDA projects for Fortune 100 companies.
- Happy Fun Corp (Contractor) MAR 2013 - DEC 2014
Focus on front end, php, mysql and Wordpress development. Consistently received work because of client dedication and quick turn around time.
Selected Accomplishments:
 - Utilized Google Maps API and php to build site where users can post building listings, including interactive maps and internal messaging system: [Tensource](#)
 - Develop Wordpress theme and custom widgets for large blog: Cricket's Circle
 - Created motion graphics piece displaying app functionality: Snap My Ad
- Consumer Eyes (3D Modeler & Web Developer) APR 2008 - FEB 2013
Promoted for substantial contribution to the company including: improving time management and organization, cutting company spending by updating website instead of outside hiring, adding to company equity by developing web tools, improving client relationships by offering motion graphics, improving the quality of concept art work by using better modeling practices, lighting techniques and textures for 3D renders
Selected Accomplishments:
 - Hired for 3D modeling, but expanded to front-end development by creating web tools
Also expanded to motion graphics by becoming the sole creator of concept animation, animated presentations, intros, lower thirds and animated logos
 - Created several motion graphics pieces for Kraft Foods and its subsidiaries
 - Suggested and then built a web interface where clients can monitor customer responses to questions while isolating consumers from each other's responses. This included an easy-to-use question creation CMS and email interface.
 - Suggested and then built a search engine where the user can select powerpoints or rendered objects based on images and download these files or locate them on an internal server
- Contractor JAN 2006 - Present
Consistently receives freelance work through self-promotion and networking. Gained experience in client facing, professionalism and time management
Selected Accomplishments
 - Build search engine for cruises. Wrote parse script that automatically runs through dat files and sends relevant information to database: [Silversea Cruises](#)
 - Build widget for city guide section of lifestyle website: [The New Potato](#)
